

## True Aspect Masking – 2L

§ **Motorized CH** Independently controlled, motorized constant image height screen: 2.40 to 16:9 ratio, with preprogrammed intermediate stops.

§ **Enlightor-4K** The only AT screen material without a minimum seating distance for uncompromised image and sound quality.

§ **Thin (3.75") profile** The slimmest border masking screen available.

§ **Infinite Black™ velvet borders** Frames the image with perfect overscan absorption.

§ **Acoustically transparent masks** Allows the freedom to locate your speakers anywhere behind the screen without compromise.

Imaging is optimum when the projected image is exactly bordered by our Infinite Black™ velvet borders, providing a significant contrast enhancement together with a real focus on the image. With the varying aspect ratios of movies, the True Aspect Masking screen masks to adjust the black borders of the image to its actual size.

The True Aspect Masking (2L) screen is a constant height, acoustically transparent projection screen using the Enlightor-4K screen fabric, provided with automated lateral masks controlled electronically. For versatile masking with any home automation system, it can also be simply controlled by dry contacts, IR or RF remotes, Vdc trigger or RS-232.

Exclusive to Seymour-Screen Excellence is that the frame width is exactly the same (3.75") as the Reference Fixed frame screens, due to it utilizing the same frame profile. Only a slightly rearward extension hides the motor and masking assemblies, with the total depth being 5.8". When comparing automated masking screens, Seymour-Screen Excellence's TAM screens are the sleekest, most sophisticated available anywhere.

Built in Iowa, the TAM-2L is either shipped preassembled for simple unpack and hang installation, or split into halves for less accessible spaces.
